Project Title	Dentistry Web App		
D • •	About the company:		
Project	- This is a private dentistry/clinic with numerous patients and the dentistry has multiple dental procedures that they do.		
Description			
	About the project:		
	- While we were looking through their site, we noticed that the site is lacking		
	some functionalities that would make it run more efficiently. We aim to add		
	different functionalities and try to update the website. We also want to change the design of the site to be more appealing in hopes that new patients will visit		
	the clinic and eventually become regular patients.		
Problem/	The current website exhibits an outdated design that does not align with		
Opportunity	modern user expectations. User interface elements lack responsiveness and		
Assessment *	fail to provide an intuitive and engaging browsing experience.		
	1. The new website aims to provide a contemporary and visually		
	2. appealing design, ensuring an improved and enjoyable user		
	3. experience.		
	User interface elements will be optimized for intuitiveness,		
	promoting easy navigation and engagement.		
	The project proposes the integration of advanced functionality,		
	, , , ,		
	including a streamlined appointment scheduling system,		
	comprehensive information architecture, and interactive features		
	to enhance user engagement.		
Desired Project			
Outcomes/	1. For the business more patients mean more revenue that can be		
Requirements*	generated, the new website will appeal to new patients to visit		
1	the clinic.		
	the timit.		

	2.	This new website will be completely free so the business gets a better site and we have a site that we can add to our portfolio.	
	3.	The company must let us have the creative freedom and trust	
		what we believe the consumers will gravitate to.	
	4.	Lots of communication between us and the business so that both	
		parties can say what they want and need and have a discussion	
		continuously.	
Key Deliverables			
to be produced by	1.	Time management, the business will be handling their patients	
students*		while we have numerous other classes that also have projects	
		that can cause some issues.	
	2.	Scope of project. Will we create both a portal for patients to	
		check their information, a general portal for new patients to book	
		appointments, and a portal for the workers to have access to	
		everything.
